PRE-PUBLICATION BRAND GOVERNANCE GATE

BrandGate

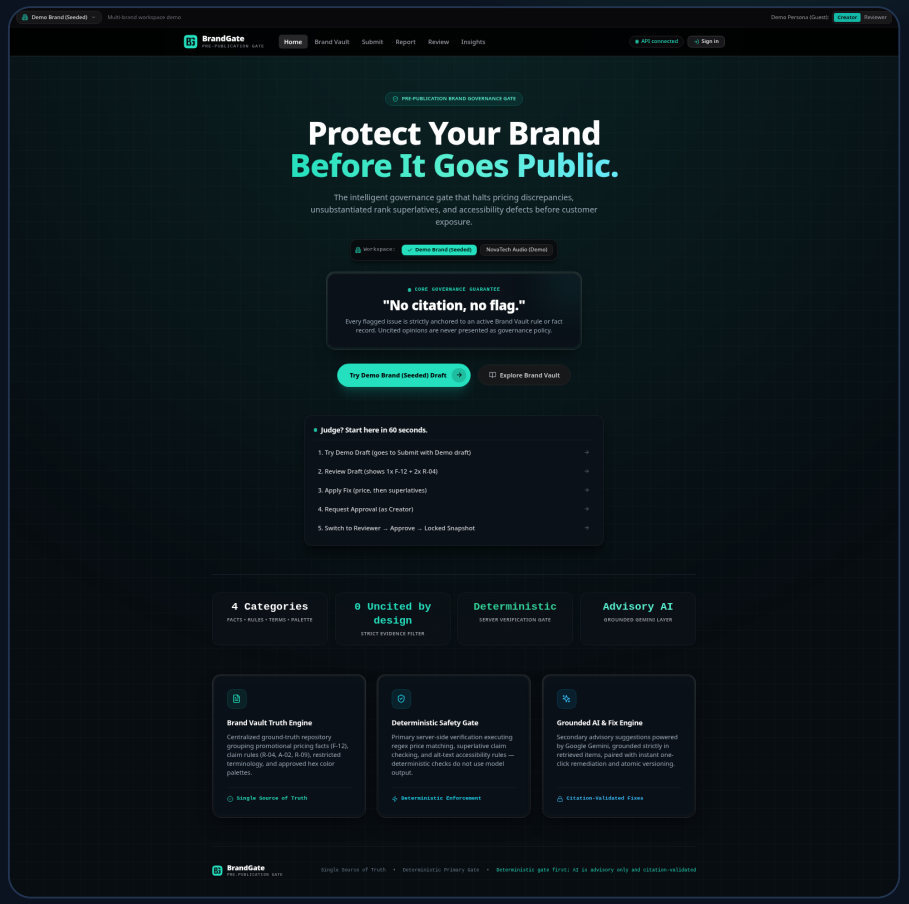

Protect Your Brand
Before It Goes Public.

The governance gate that halts pricing discrepancies, unsubstantiated rank superlatives, and accessibility defects before customer exposure. Every check is deterministic and anchored to the Brand Vault.

"No citation, no flag."

Team: STRAW HAT PIRATE (solo)
Leader: Manthan Shravansingh Rajpurohit

Final Product Document — Codex 48. All screenshots in this document were captured live from the production site in Guest Demo mode on 3 Nov 2026. No sign-in is required to run the full judge path.

Home — hero, governance guarantee, primary demo button and the "Judge? Start here in 60 seconds." card, with "API connected" in the header. Captured 3 Nov 2026.

GROUND TRUTH FIRST

The Gate and the Brand Vault

Brand Vault — Demo Brand (Seeded), all 12 items. Captured 3 Nov 2026.

BrandGate checks creative copy **before** publication against a single source of truth: the Brand Vault. In Guest Demo mode the vault is read-only, and every finding the gate raises must cite an active vault record — an uncited opinion is never presented as governance policy.

Demo Brand vault — 12 items

- **1 Fact** — F-12 Festive Cookware Promotional Price: "Festive cookware offer Rs. 1,299, effective 24–31 Oct 2026."
- **3 Rules** — A-02 current approved logo only; R-04 superlatives & ranking claims require approved evidence; R-09 mandatory descriptive image alt text.
- **4 Terms** — T-01 "clinically proven" (restricted), T-02 "India's No. 1" (restricted), T-03 "certified quality" (approved), T-04 "trusted cookware brand" (approved).
- **4 Palette colours** — P-01 #1E3A8A, P-02 #D97706, P-03 #F8FAFC, P-04 #0F172A.

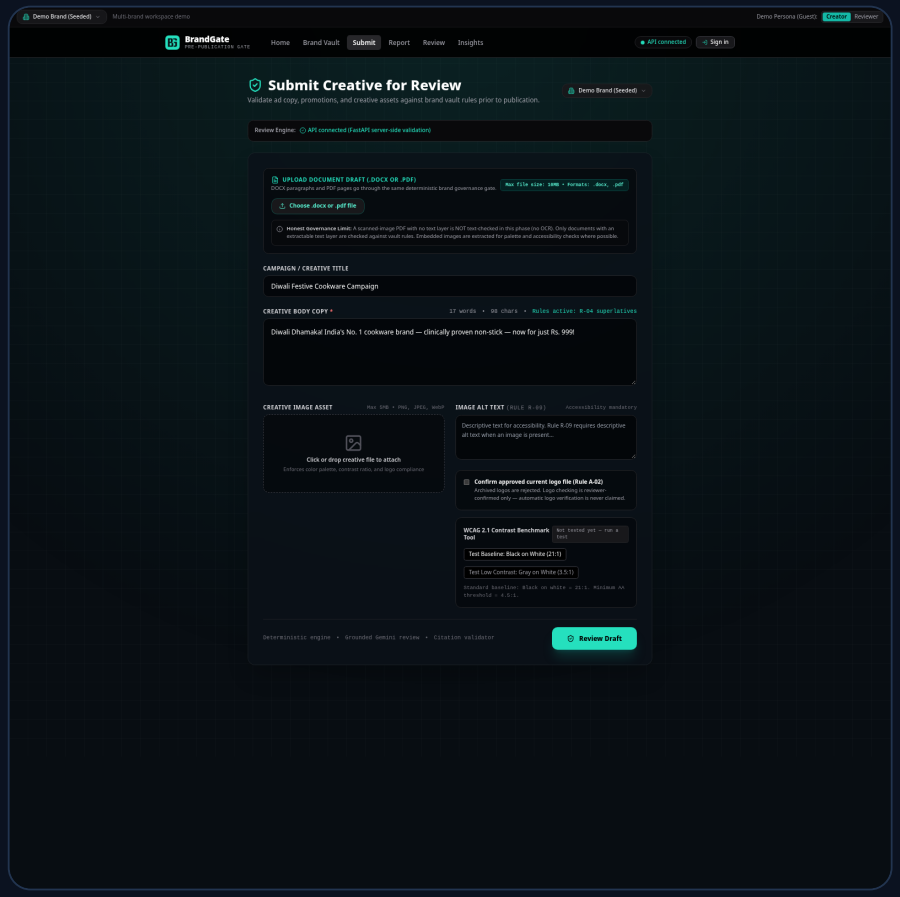

The 60-second judge path

- 1. Try Demo Draft 2. Review Draft (shows 1× F-12 + 2× R-04) 3. Apply Fix (price, then superlatives)
- 4. Request Approval (as Creator) 5. Switch to Reviewer → Approve → Locked Snapshot

A second, fully separate workspace — NovaTech Audio (Demo) — carries its own vault (F-20, R-15, T-10, P-10, P-11) and its own Insights. Pages 6 and 7 show both brands.

STEP 1-2 OF THE JUDGE PATH

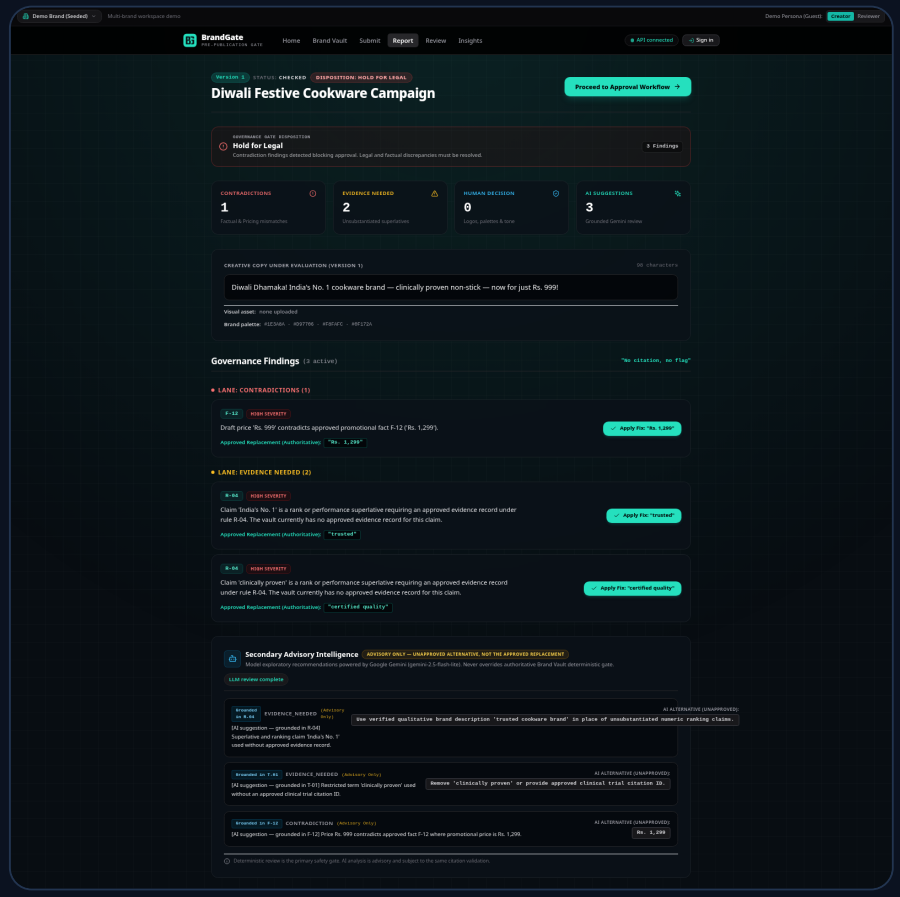

Submit the Demo Draft — the Gate Holds It

Submit — Demo draft loaded. Captured 3 Nov 2026.

Title: **"Diwali Festive Cookware Campaign"**. Body copy (17 words, 98 chars):

> "Diwali Dhamaka! India's No. 1 cookware brand — clinically proven non-stick — now for just Rs. 999!"

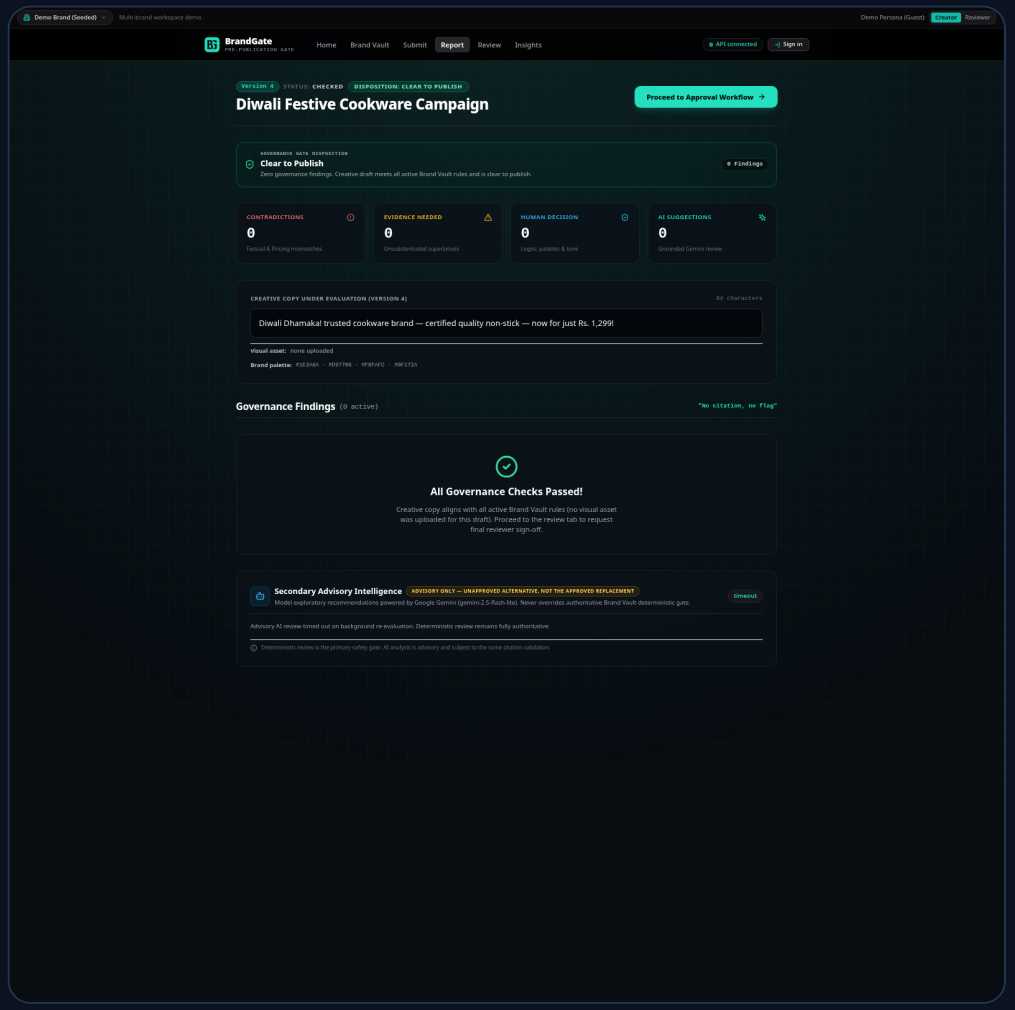

Report — Version 1. Captured 3 Nov 2026.

Disposition: HOLD FOR LEGAL | **3 findings**

- **1× Contradiction — F-12:** draft price Rs. 999 contradicts the approved promotional fact Rs. 1,299.
- **2× Evidence Needed — R-04:** "India's No. 1" and "clinically proven" are superlatives with no approved evidence record in the vault.
- **0 uncited findings** — every finding carries a vault citation ID and an approved replacement.

STEP 3 OF THE JUDGE PATH

One-Click Fixes — Clear to Publish

Report — Version 4, zero findings. Captured 3 Nov 2026.

Each finding carries its **approved replacement** from the vault. One click on Apply Fix rewrites the copy and creates a new version — the old version is never edited.

Version journey (one live run, 3 Nov 2026)

VERSION	CHANGE APPLIED	FINDINGS	DISPOSITION
Version 1	Demo draft as submitted	3	Hold for Legal
Version 2	F-12 fix — price Rs. 999 → Rs. 1,299	2	Clear with Edits
Version 3	R-04 fix — "India's No. 1" → "trusted"	1	Clear with Edits
Version 4	R-04 fix — "clinically proven" → "certified quality"	0	Clear to Publish

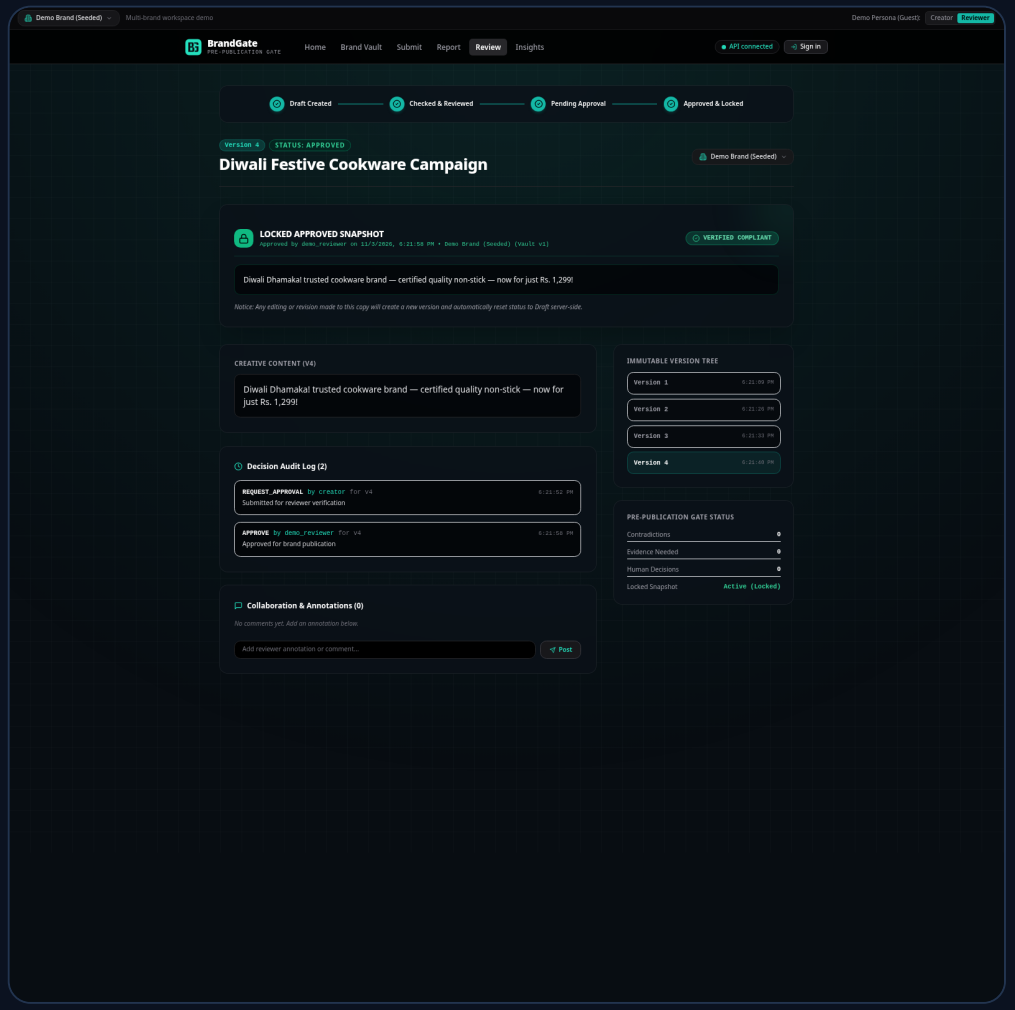

Final copy (94 characters)

> "Diwali Dhamaka! trusted cookware brand — certified quality non-stick — now for just Rs. 1,299!"

Advisory Gemini suggestions are shown on the Report as a separate, clearly labelled layer ("Advisory only — unapproved alternative"). They never override the deterministic gate.

STEPS 4–5 OF THE JUDGE PATH

Approval — Locked Approved Snapshot

Review — Version 4 approved and locked. Captured 3 Nov 2026.

STATUS: APPROVED **VERIFIED COMPLIANT**

How the approval ran (3 Nov 2026)

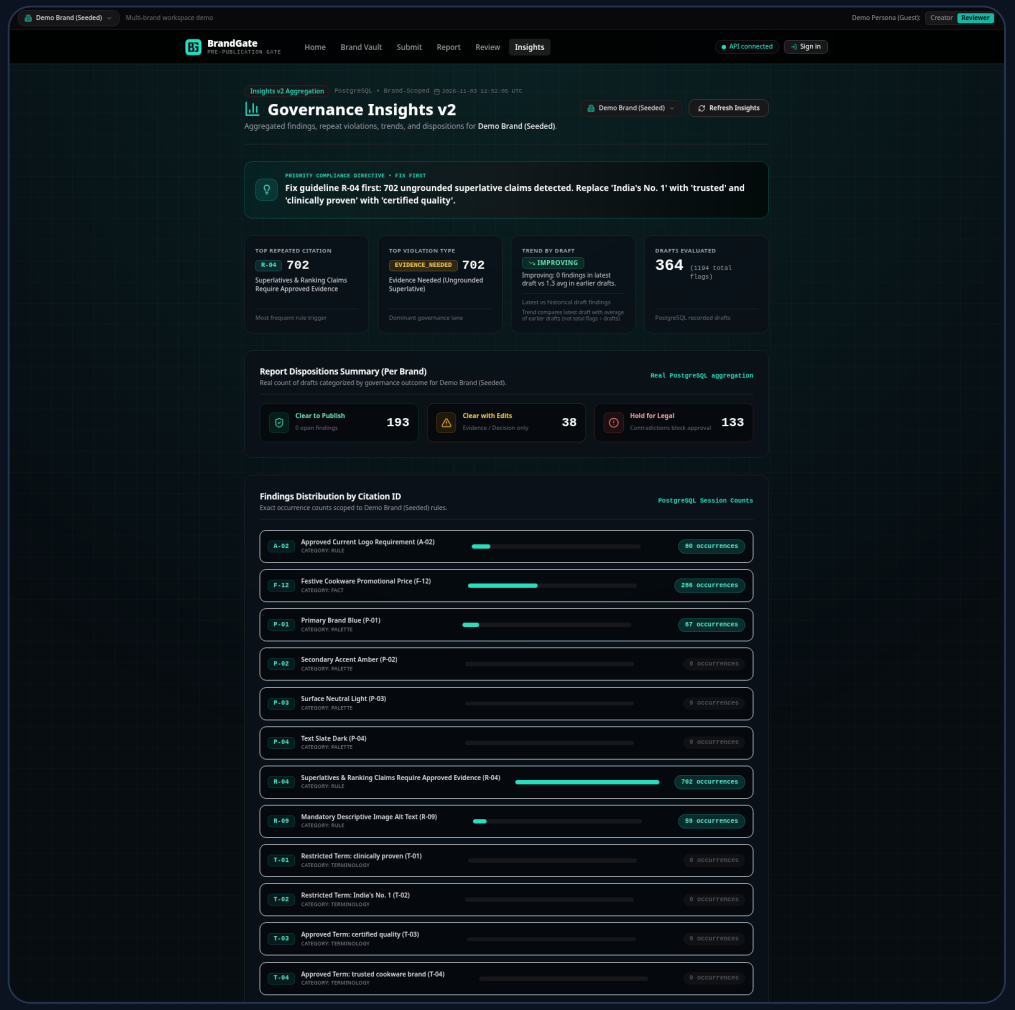

- **6:21:52 PM** — Creator requests approval for Version 4 (audit log: REQUEST_APPROVAL by creator).
- Persona switches to Reviewer. The Creator cannot approve their own draft.
- **6:21:58 PM** — Reviewer approves (audit log: APPROVE by demo_reviewer for v4, "Approved for brand publication").
- The copy locks as a **LOCKED APPROVED SNAPSHOT**. Gate status at lock: Contradictions 0, Evidence Needed 0, Human Decisions 0 — Locked Snapshot: Active (Locked).

Immutability, on screen

- The version tree keeps Versions 1–4 side by side; no version is ever overwritten.
- Every decision is written to the Decision Audit Log.
- On-screen notice: any editing or revision of the locked copy creates a new version and resets status to Draft, server-side.

The locked snapshot text is identical, character for character, to the Version 4 copy on page 4.

Insights — Demo Brand (Seeded)

Insights — Demo Brand (Seeded). Page timestamp 2026-11-03 12:52:05 UTC. Captured 3 Nov 2026.

METRIC (EXACTLY AS SHOWN)	VALUE
Drafts evaluated	364
Total flags	1194
Top repeated citation	R-04 — 702
Top violation type	EVIDENCE_NEEDED — 702
Clear to Publish / Clear with Edits / Hold for Legal	193 / 38 / 133

Fix first

"Fix guideline R-04 first: 702 ungrounded superlative claims detected. Replace 'India's No. 1' with 'trusted' and 'clinically proven' with 'certified quality'."

Trend by draft

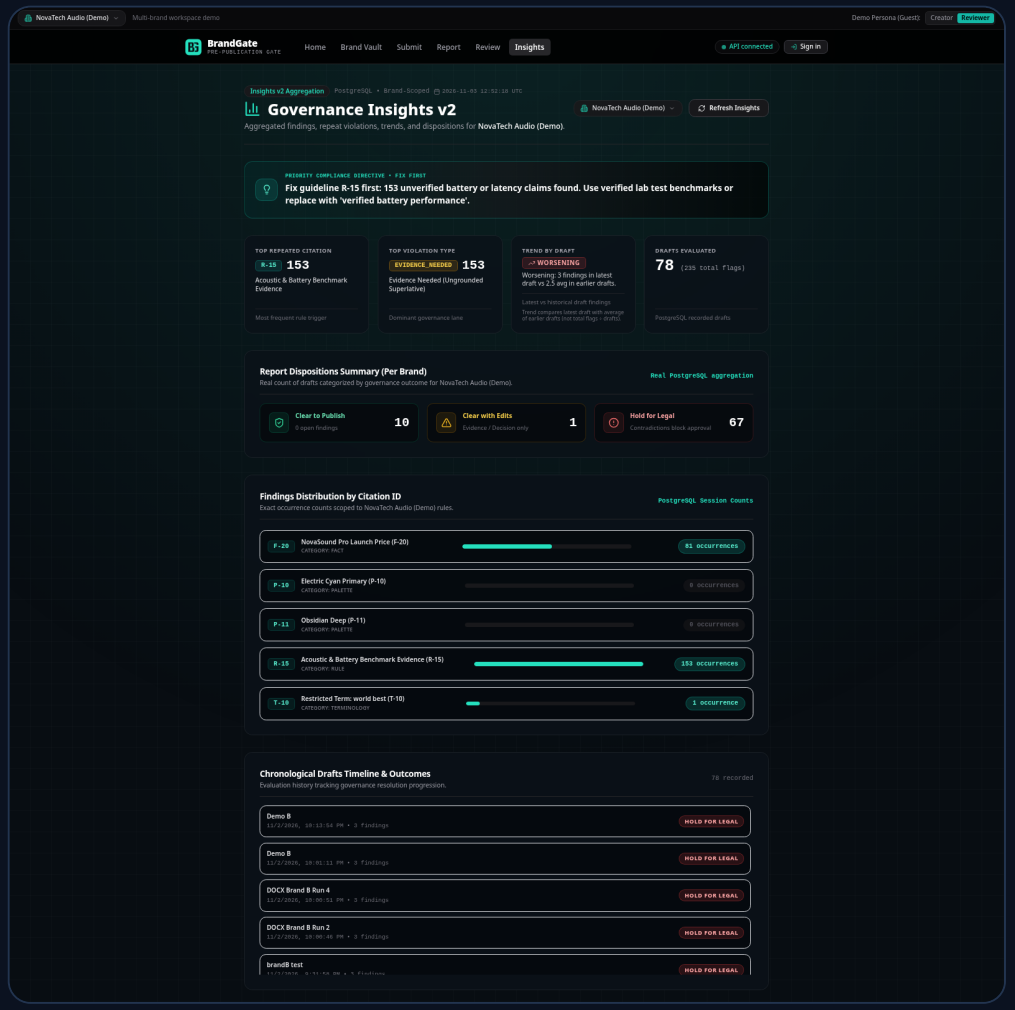

IMPROVING — "Improving: 0 findings in latest draft vs 1.3 avg in earlier drafts."

Distribution by citation ID

A-02 80 • F-12 286 • P-01 67 • P-02 0 • P-03 0 • P-04 0 • R-04 702 • R-09 59 • T-01 0 • T-02 0 • T-03 0 • T-04 0

These are live aggregates over every demo draft recorded in PostgreSQL; they grow as the demo is used, so the values above are the exact values the page showed at the timestamp in the caption — not constants of the product.

Insights — NovaTech Audio (Demo)

Insights — NovaTech Audio (Demo). Page timestamp 2026-11-03 12:52:18 UTC. Captured 3 Nov 2026.

METRIC (EXACTLY AS SHOWN)	VALUE
Drafts evaluated	78
Total flags	235
Top repeated citation	R-15 — 153
Top violation type	EVIDENCE_NEEDED — 153
Clear to Publish / Clear with Edits / Hold for Legal	10 / 1 / 67

Fix first

"Fix guideline R-15 first: 153 unverified battery or latency claims found. Use verified lab test benchmarks or replace with 'verified battery performance'."

Trend by draft

WORSENING — "Worsening: 3 findings in latest draft vs 2.5 avg in earlier drafts."

Distribution by citation ID

`F-20 81 • P-10 0 • P-11 0 • R-15 153 • T-10 1`

Brand isolation, verified on this capture: the NovaTech distribution contains only NovaTech citation IDs. No Demo Brand citation (F-12, R-04, P-01…) and no Demo total appears anywhere in NovaTech's numbers.

WHERE BRANDGATE STANDS

Improvements & Honest Limitations

Three improvements, in order

- **(1) Multi-brand workspaces** — Demo Brand (Seeded) and NovaTech Audio (Demo), each with its own vault, drafts and brand-scoped Insights (pages 2, 6, 7).
- **(2) DOCX/PDF extraction** — document drafts (.docx / .pdf, max 10MB) go through the same deterministic gate as typed copy; the no-OCR limit is stated on the Submit page itself.
- **(3) Guideline-clarity Insights v2 + hardened image checks** — per-brand aggregates with fix-first guidance, plus image alt-text (R-09), palette and WCAG contrast checks (21:1 baseline, AA threshold 4.5:1).

Honest limitations

- No minimum-length rule: a 1-character or emoji-only draft with no brand violations passes clean (0 findings).
- Demo promo dates are seeded demo data, not calendar-enforced: F-12 (24–31 Oct 2026) still flags Rs. 999 in the demo on 2–3 Nov 2026, by design for the judge path.
- Insights timeline shows a draft's terminal approval status; older October entries can show CLEAR TO PUBLISH alongside their earlier version findings count.
- Version tree on Review is display-only; there is no version selector on Report. Per-version image history is not stored (draft_versions has no image_url column).
- Mobile 360px and 120% browser zoom were NOT verified.
- NovaTech approved promo price is Rs. 4,999 (F-20, effective 1–30 Nov 2026); the NovaTech demo draft price Rs. 3,499 is the unapproved price that F-20 flags.
- Remote image fetch is not yet restricted to the Supabase storage domain (3s timeout).

SYSTEM DESIGN

Architecture & Complete Features

Architecture

- **Frontend:** React + TypeScript (Vite) + Tailwind CSS, deployed on Vercel (repo root folder `frontend`).
- **Backend:** Python FastAPI, deployed on Render free tier (first call after idle can take 30–60 seconds; frontend shows "Waking up server...").
- **Database:** Supabase PostgreSQL + pgvector (keyword-retrieval fallback active, embeddings unpopulated), Supabase Auth, Storage bucket `brandgate-creatives` (public).
- **AI:** Google Gemini (see live Report panel for the deployed model string) — via AI Studio, retrieval-only, citation-validated.

Core rule: "No citation, no flag. Deterministic checks are primary; Gemini is secondary/advisory only."

Complete features

- Brand Vault truth engine (facts, rules, terminology, palette)
- Deterministic review: price reconciliation, superlative evidence check, restricted terminology, alt-text, WCAG contrast (AA threshold 4.5:1, black-on-white 21:1 passes)
- Grounded Gemini advisory suggestions, citation-validated, clearly labelled "Advisory only"
- One-click Apply Fix with approved replacements, new version per fix, old version never overwritten
- Approval workflow: Creator requests, Reviewer approves, creator self-approve blocked, approve disabled while findings are open, approved snapshot locked/ immutable, post-approval edit creates a fresh draft
- Multi-brand workspaces: Demo Brand (Seeded) and NovaTech Audio (Demo), fully isolated vaults, drafts, Insights
- DOCX/PDF extraction (max 10MB, text-based documents only, scanned PDFs are not OCR'd, findings carry Page badges)
- Insights v2: per-brand aggregates from PostgreSQL, top citation, dominant violation type, trend by draft, fix-first guidance, full distribution by citation ID
- Image governance: palette sampling labelled "Approximate", Human Decision only, never Contradiction; logo check A-02 reviewer-confirmed only, never automatic; alt-text R-09
- Guest Demo mode: full judge path with no sign-in, guest writes only for demo brand scope, recorded as guest / demo_reviewer

Full clone-and-run instructions are in README Section 7 of the public repo.

EVIDENCE & WHAT COMES NEXT

Testing Details & Roadmap

Testing details — verified checks

- 2026-11-02 22:19 IST full live check after Phase 6.3: Judge card Step 1 forces Demo Brand; remove-then-reupload in the same session gives exactly 1x R-09 + P-01; Report palette brand-scoped (NovaTech only P-10/P-11); R-09 navigates to Submit; judge path twice to locked snapshot.
- 2026-11-03 18:19–18:22 IST full judge path re-run in Guest Demo mode for this document: draft → HOLD FOR LEGAL (1x F-12 + 2x R-04) → Apply Fix ×3 → Version 4 CLEAR TO PUBLISH (0 findings) → Request Approval → demo_reviewer Approve → LOCKED APPROVED SNAPSHOT, VERIFIED COMPLIANT.
- Document checks verified live: Brand A DOCX (1x F-12 + 2x R-04), Brand B DOCX (1x F-20 + 2x R-15), Brand A PDF (F-12 Page 1, R-04 Page 2), empty DOCX honest no-text message, exactly 10,000-character DOCX, brand-switch restoration, double-click (no duplicates), refresh / back-forward, forbidden-string sweep (no "trusted by millions", no "100 / 100", no "STATUS:OK").

NOT verified

- Mobile 360px and 120% browser zoom were NOT verified. Over-10MB upload and scanned-PDF behaviour were NOT tested with real files; only the on-page limit text was verified.

Roadmap — FUTURE PLAN — NOT YET BUILT

- Per-version image history (add image_url to draft_versions via a proper migration)
- Version selector on Report to open older versions
- Minimum-content warning for 1-character / emoji-only drafts (warning only, not a new block, until the rule is defined)
- Supabase storage-domain allowlist for remote image fetch
- On-page explanation of the Insights trend average formula
- Mobile 360px and 120% zoom verification
- Disabled Approve button styling made visually distinct from enabled buttons
